

## Policy for the future:

We committee to conducting environmental activities in harmony with the local community, establish a policy of working towards the preservation and regeneration of rich nature and biodiversity, and promote activities aimed at coexisting with nature.

## < Examples >

### Aisan Toyota No Mori

Since 2016, We have been carrying out thinning and maintenance in the forest adjacent to the factory, and since 2022, have been conducting biological surveys in collaboration with experts. we promote activities that lead to the improvement of the habitat of rare local plants and various organisms confirmed in the survey, and also work on the protection of rare species.

### Environmental education

We conduct nature observation events in collaboration with industry-academia-government partnerships, teach children about the importance of rich natural environments where diverse organisms live.

### Tree-planting activities

In overseas bases such as India, China, and Indonesia, we carry out tree planting activities suitable for the characteristics of each country's land.

## < Future issues >

- Quantitative evaluation of the environmental impact on biodiversity due to business activities and the contribution of conservation activities.
- Expansion of biodiversity conservation activities across the entire group.

## <Message for Society>

**VISION 2030 “Beaming future is in our hands”**  
Aiming to deliver a future where children can always spend their time with peace of mind and smiles, we committee to biodiversity conservation activities.
