

## Policy for the future:

Furukawa Electric Group's Basic Environmental Policy and Action Guideline states, "We will evaluate the impact of all business activities on ecosystems and endeavor to preserve biodiversity and use sustainable resources." Follow the guidelines.

## Furukawa Electric Group Biodiversity Conservation Guidelines

1. Evaluate the effects that our business activities have on the ecosystem, and minimize the harmful effects while maximizing the beneficial ones
2. To sustainably use resources and conserve biodiversity, consider more than ever the need to carry out measures against climate change, conserve resources, recycle and reduce environmentally hazardous substances
3. Carry out activities in collaboration with local communities to conserve biodiversity
