

Policy for the future:

Maintenance and protection of the biodiversity which supports our society is the foundation for the realization of a sustainable society. MUFG supports businesses that protect biodiversity through the provision of products and services. Each group company also takes appropriate measures to prevent negative impacts on biodiversity associated with our products and services.

We will not provide financing for a business violating the Convention on International Trade in Endangered Species of Wild Fauna and Flora (Washington Convention), if we recognize it has environmental and social risks or impacts.

< Initiatives by The Mitsubishi UFJ Environmental Foundation >

• Green-themed Picture Contest

The Mitsubishi UFJ Environmental Foundation has been holding the Green-themed Picture Contest with the aim to help children get to know the beauty and importance of nature. Every year, nearly 25,000 students apply for this contest, totaling 1.38 million entries so far. The event was also held in 2019 co-hosted by the Japan Federation of UNESCO Associations, with the support of the Ministry of the Environment, the Japan Committee for UNESCO, and the Mainichi Shimbun (initiatives related to Action Guidelines 7-2).

< Initiatives by Mitsubishi UFJ Trust and Banking >

• Peter Rabbit Forest for the Future

In May 2009, Mitsubishi UFJ Trust and Banking signed the Saitama Prefecture Afforestation Agreement with Nagatoro Town and Saitama Prefecture; based on this, forest conservation activities were initiated for a community forest (about one hectare in size) on Hodo Mountain in Nagatoro Town. The forest was named Peter Rabbit Forest for the Future, and employees and their families joined in tree-planting and weeding activities. In June 2019, about 60 employees participated in weeding to help the trees grow (initiatives related to Action Guidelines 3-4).
