## Policy for the future:

We will positively engage our stakeholders in forward looking dialogue and address environmental issues of climate change, biodiversity, and social issues of human rights and diversity in the course of our business operations based on our Group CSR Material Issues. By maintaining a long-term outlook, and by providing services and products that contribute to security, health, and wellbeing, we will strive as a solutions provider to promote the realization of a resilient, inclusive sustainable society.

### < Our Initiatives >

**SAVE JAPAN Project** (<https://www.sompo-hd.com/en/csr/action/npo/content4/>)

- ◆ Our customers select web-based insurance policy or choose recycled parts for vehicle accident repairs, the cost savings are used to fund projects with NPOs to conserve the environment.
- ◆ Inspiring future leaders and providing opportunities for them to take a greater interest in the environment in their local communities.
- ◆ Quantifying the social value of this project using SROI (Social Return on Investment) analysis.

**Weather Index Insurance** (<https://www.sompo-hd.com/en/csr/action/community/content4/>)

- ◆ We provide solutions to agricultural risks specific to each country to aim at reducing agricultural business risks associated with climate change.
- ◆ Paying out a contractually predetermined insurance amount when a weather index – such as temperature, wind speed, rainfall.
- ◆ We will make conservation of biodiversity to reduce the damages caused by drought for rice farmers in Northeast Thailand, for longan farmers and for rice and sesame farmers in Myanmar.
