

Policy for the future:

The Dai-ichi Life Group has stated, as one of the Dai-ichi's Social Responsibility Charter (DSR Charter), that the Group regards protection of the environment as part of a company's social responsibility, and constantly conducts environmental conservation activities. Then, the Group has established Group Action Principles for Environmental Initiatives. The Action Principles state three things, (1) Implementation of environmentally conscious activities in businesses, (2) Reduction of environmental impact from business activities, (3) Promotion of activities that raise environmental awareness which are set as Action Guidelines, in order to contribute to the realization of a sustainable society, aiming for harmony between social and economic development and the global environment. We will continue to make a united effort to protect and preserve the environment, including measures to reduce environmental impact and preserve biodiversity.

< Specific Initiatives >

① Implementation of environmentally conscious activities in businesses

- ✓ In 1990, Dai-ichi Life established the Green Environmental Plans Award to support greening initiatives with the goal of contributing to urban greening. Dai-ichi Life now supports three awards, by adding the Green Cities Award and the Competition for Specialized Greening Technology for Rooftops and Wall Facings. Approximately 200 green spaces have been subsidized up until to 2018. As a result of contribution to rich environment of urban greening and preserve biodiversity etc., Dai-ichi Life received the Minister of Land, Infrastructure, Transport and Tourism's Award for Service in Urban Greening in 2000 and 2014.

③ Promotion of activities that raise environmental awareness

- ✓ Dai-ichi Life provides training movie and confirmation test through the intranet (The plastic waste problem has been set as a learning theme in 2019FY.) in the Environment Month advocated by the Ministry of the Environment, in order to raise the awareness of executives and employees about global environmental issues.
- ✓ Conducted environmental volunteer activities at each department and introduced host for volunteers in each region.

② Reduction of environmental impact from business activities

- ✓ Dai-ichi Life has established medium- to long-term CO₂ emission reduction targets of 40% by fiscal 2030 and 70% by fiscal 2050 (both compared to fiscal 2013). The Dai-ichi Life Group is also working toward a target of 1% year-on-year reductions in CO₂ emissions. (refer to the following table below)

Dai-ichi Life Group	2016FY	2017FY	2018FY
Total CO ₂ Emissions (t-CO ₂) (compare to the previous FY)	171,900 (96.6%)	166,000 (96.6%)	155,300 (93.6%)

(Recent topics)

- ① Have switched to renewable energy derived from hydropower for Hibiya HQ's electricity since April 2019.
- ② Joined an international initiative "RE 100" which has set a goal of switching to 100% renewable energy from the perspective of promoting since August 2019.
