

TODA CORPORATION

https://www.toda.co.jp/sustainability/environment/biodiversity_policy.html

Policy for the future:

Toda Corporation has resolved nature-related issues established “Toda Corporation Biodiversity Action Guidelines” and promoted measures to in order to ensure that each employee recognizes the importance of biodiversity and develop it into construction operations.

We aim to realize a sustainable society in harmony with nature, and we strive to conserve biodiversity, make sustainable use of natural capital, and restore nature through the provision of green infrastructure.

<Activities to be addressed in conservation native species>

At our Tsukuba Technology Research Institute, we developed “Tsukuba Regeneration Village (Tsukuba Saisei no SATO)”. In this place, We transplanted and cultivated only native species which inhabit in Tsukuba. This place is maintained and managed through monitoring surveys, six times a year. We monitor and evaluate changes in the ecosystem. The green space in this area was evaluated in two value categories, “Ecosystem Services and Healthy Ecosystems” and “Rare Species”. It was certified as a “Nationally Certified Sustainably Managed Natural Sites”.

Green Office Building at Tsukuba Technology Research Institute and “Tsukuba Regeneration Village”

Solar radiation control by wall greening (Regional native climbing plant)

Rare species inhabit in this place (Near threatened)
