

## Policy for the future:

The “Nippon Express Group Business Plan 2023~‘Dynamic Growth’” that started in FY2019 advocates establishing “ESG-oriented business management to realize sustainable development and improve corporate value”. With regard to the environment, we are committed to working as a logistics company to achieving our 2023 targets for reducing CO<sub>2</sub> emissions.

More specifically, we have established the Nippon Express Group Environmental Charter to fulfill our “Responsibilities to the Earth’s Environment” as outlined in the Nippon Express Group Charter of Conduct that stipulates and regulates day-to-day behavior within the Nippon Express Group, and we will be independently and proactively striving to fight global warming, preserve biodiversity, and construct a recycling-based society.

### < Activities >

In Iide Town, Yamagata Prefecture, and Nichinan Town, Tottori Prefecture, we take part in forest cultivation activities twice a year (each summer and autumn) with the aims of enhancing the multifaceted functions of forests, contributing to local communities, and educating environmental human resources.

### < Achievements >

We have planted 10,170 saplings since we began these activities in 2007.

### < Future issues >

Conserving the Earth’s environment is fundamental to biodiversity, and it is important that we continue our activities in this regard from a long-term perspective.

### < Message >

The Nippon Express Group shall be mindful of its responsibilities as a corporate group to society and the general public, and shall proactively contribute to environmental conservation as a “good corporate citizen” by practicing environmental management.
