

## Policy for the future:

### ANA Group Environmental Principles

- The mindset to value the environmental starts with the recognition of the burden we place on the Earth.
- We will use natural resources and energy with care, and contribute to attaining a prosperous and sustainable society.
- We will take initiative in environment conservation activities and share our for the Earth with people around the world.

### ANA Group Environmental Policies

ANA Group, recognizing the global environmental issues, including climate change and the conservation of biodiversity, as a quintessential management task, aims to be an “Environmental Leading Airline Group” through all engaged activities.
