Policy for the future:

Based on our corporate vision: Group Vision, we are pursuing sustainability actions to help make society more sustainable. We have launched The Seibu Group's Environmental Policy to clarify our commitment on taking environmental measures. We have pointed out 1) reducing greenhouse gas emissions, 2) waste reduction, 3) conserve water resources and 4) protect forests and biodiversity as key objectives that requires priority in our Group wide business activities.

♦ Introducing some of our efforts

• Protecting forests and clean water supply

Seibu Railway Co., Ltd. maintains a 130-hectare forest in the city of Hanno, together with the local government and civil groups. This effort was certified as the highest rank under SEGES¹ in 2017.

Prince Hotels, Inc. cooperates with five local governments for afforestation and other activities to protect the forests. The company also donates portion of the sales of the mineral water to municipalities to help them maintain good water quality. (Total 10 million yen to Uonuma city)

• Promotion of greenery

As a company that has a mission to connect people and nature, Seibu Landscape Co. Ltd., has contributed to greenery promotion and environmental protection by developing special green technologies, creating green spaces, operating urban parks that cover 2,500-hectare in total and offering environmental education programs.

• Children education program

Yokohama Hakkeijima Inc. offers the program called Sea Paradise Kids school to help the next generation study about biodiversity, global warming and importance of ocean.

♦ Next steps

We will continue our efforts on protecting forests, biodiversity and water resources. Meantime, we will accelerate our initiatives for other social issues such as reducing greenhouse gas emissions, food wastes and plastic wastes. We believe that facing these challenges can also be our new business opportunities that can benefit us.
