

The San-in Godo Bank, Ltd.

<https://www.gogin.co.jp/ir/englishdisclosure/>

Policy for the future:

In light of the principles of the United Nations' Sustainable Development Goals (SDGs), in order to realize a sustainable regional society and environment through its business, the San-in Godo Bank Group has defined policies in fields to be actively addressed and fields to be avoided with respect to investments and loans.

We will not invest in projects that have a significant impact on high conservation value areas, such as “Ramsar sites” (e.g. Lake Shinji and Nakaumi) and “UNESCO World Heritage Sites” (e.g. Iwami Ginzan).

“Gogin Kibo no Mori (Forests of Hope)” (since 2006)

Guided by the philosophy of “Protecting the natural beauty of our home region” and “Continuing commitment to enabling everyone to do what is within their power to help,” San-in Godo Bank joins forces with others across the region in activities designed to responsibly manage forests for the sake of future generations.

Through practical forest conservation activities by directors, executive officers, and employees and exchanges with regional volunteer groups, we have provided information on the importance of forest conservation and the present conditions of forests, and we have engaged in activities to widen the scope of forest development projects for many years. San-in-originated initiatives for forest conservation activities by the Bank in collaboration with the region are developing into a nationwide campaign.

Reed-cutting volunteer activities (since 2013)

With support the activities being undertaken by Shinjiko Mizu Kankyo Kaizen Kyogikai (Lake Shinji Water Environment Improvement Association) for the purpose of purifying the water of Lake Shinji, and participate in reed-cutting volunteer activities. Reeds function to make water clean, but those that wither in winter are left as deposits and become sludge at the bottom of the Lake. Cutting reeds prevents the nitrogen and phosphorus absorbed in them from flowing out into the lake again.

Creation of reed-paper business cards

We use business cards made of reed paper.
