## Policy for the future:

In line with the slogan “Green Future with US,” NTT Urban Solutions Group aims to realize a “future in which people and nature live together,” and recognizes the conservation and recovery of biodiversity as an important management issue. NTT Urban Solutions Group is working to identify the possibility that land use and resource use associated with its business activities may lead to damage to biodiversity, and to avoid, reduce, and recover from such impacts.

### ● Business activities that take biodiversity into consideration (Ecosystem conservation and restoration)

At the Shinagawa Season Terrace (Minato-ku Tokyo), we have planted mainly native species in a large green space and created a biotope to ensure a good environment for living organisms. In the ecosystem survey \* conducted by experts in 2023, the habitats of a wide range of living organisms, including plants, birds, insects, and aquatic organisms, were surveyed, and abundant living organisms were observed (189 species of plants, 31 species of birds, 35 species of insects, and 11 species of aquatic organisms were identified). Among them was a kingfisher designated as endangered according to the Red List established by the Tokyo Metropolitan Government. We are working to preserve and restore local ecosystems by securing valuable green spaces in Tokyo area.

*Shinagawa Season Terrace green space*

*Kingfisher, an endangered species of type 2*

\*For birds and insects, Shibaura Central Park, which is close to the survey site, is included.

### ● NTT Urban Solutions Group Initiatives

- ✓ Prior to its own business activities, NTT Urban Solutions Group strives to identify local ecosystems that have an impact on biodiversity, and promotes business activities that combine consideration for biodiversity and comfort for users through initiatives such as urban greening and ecosystem conservation and development.
- ✓ Through its business activities, NTT Urban Solutions Group actively promotes greening, and strives to cultivate vegetation that is suitable for each local area.
- ✓ NTT Urban Solutions Group conducts follow-up surveys (monitoring) as necessary in areas that have an impact on biodiversity, and works diligently to conserve and restore ecosystems in those areas.
- ✓ NTT Urban Solutions Group endeavors to strengthen communication on biodiversity with its customers, local communities, local government, business partners, and its group employees. NTT Urban Solutions Group also provides opportunities for its employees to learn about biodiversity and improve their biodiversity literacy.

- **Slogan** Under the slogan “Green Future with US,” NTT Urban Solutions Group is actively working on environmentally friendly real estate development to reduce its environmental impact.

### “Green Future with US” - Creating a prosperous and sustainable future together -

NTT Urban Solutions Group will work with everyone involved in building and assembling “our towns of tomorrow” to maximize the use of ICT, real estate, energy, and environmental technologies to realize a prosperous and sustainable future in which society is decarbonized, resources are recycled, and people and nature coexist.
